

佳成Fist对接接口

一、接口地址

生产环境：<https://link.jcex.com/gateway/link.do>

二、接口说明

1.请求格式

Content-Type: application/json

字符集编码：UTF-8编码

请求方法：POST

2.请求头的基本参数

请求头需要增加以下基本参数:

请求头字段	说明
app_key	必填，开放平台应用管理分配
format	默认为json
method	必填,请求调用的方法名称,比如: test.base.platform.list
nonce	请求唯一值，必须全局唯一，可采用uuid
sign_type	默认为md5
timestamp	时间戳，utc标准时间13位数字值,比如: 1723109764001
version	默认为1.0

三、签名规则

1.请求头的基本参数值（不需要参数名）按以下顺序进行合并:

app_key+format+method+nonce+sign_type+timestamp+version

2.合并后再拼接平台分配的app_secret值，

3.将合并的值进行MD5的32位计算，并小写。

4.签名的计算公式：

sign=MD5(app_key+format+method+nonce+sign_type+timestamp+version+app_secret)。
